

BIA China Special Interest Group Webinar

Update on China biopharma landscape and partnering opportunities

BIA welcome

Steve Bates
CEO
BioIndustry Association

China Special Interest Group

The China SIG was set up with the China-Britain Business Council (CBBC), and supported by the Department for International Trade (DIT).

- To home in on issues with Britain/China collaboration and investment *specific to biotechnology and early stage companies*
- To provide a network of support and information for companies exploring the possibilities and provide a forum for candid input from group members
- To act as a forum for UK companies to actively engage with UK-China biotech activities and the UK government's business development strategies in the sector. To include details of high-level official visits; conferences & trade shows; missions; seminars; meetings and any other relevant events in the sector
- Ultimately to provide a Forum for UK organisations in the sector to explore the opportunities for them to grow their business in and with China, via trade & investment

Growing Importance of China

- **Regulation** of drugs has changed with a new approach from the Chinese regulator The National Medical Products Administration (NMPA)
- **Re-imbursment** procedures have changed for this huge market
- **Talent** policies to get experienced leaders to return “sea turtles” are working and an ecosystem is developing
- **Capital** and Public Markets
- **Improved Access** to markets

Activities in China

September 2019 - BIA announced major initiative with AstraZeneca and new state of the art lifescience innovation campus in Wuxi China

Activities in China

November 2019 Shanghai, China

BIA supported a UK Investor Track at the China Healthcare Summit. Six member companies came out to present

Activities in China

WuXi Healthcare Forum in Shanghai, March 2019

Boao Forum in Hainan Province, March 2019

Xiamen delegation, September 2019

Activities in China

Guangxi delegation, December 2019

WuXi Global Forum, January 2020

Covid disruption – maintaining relationships and continued collaboration

Key Learnings from Coronavirus Challenge and Innovating for a Sustainable Future

Zoom Webinar

2nd April, 2020 10:00 – 11:30 (UTC+00:00) / 17:00 – 18:30 (UTC+08:00)

National Security & Investment Regime

National Security and Investment

- Regime came into force on **4 January 2022**
- Applies to transactions on or after 12 November 2020

Sector definition: Synthetic Biology

Exceptions – human or veterinary medicines or immunomodulatory approaches

6.—(1) Exceptions to the activities described in paragraph 2 are the ownership, ownership of intellectual property or development of the matters set out in sub-paragraph (2) that employ synthetic biology at any stage of the development or production, unless the circumstances set out in sub-paragraph (3) apply.

(2) The matters referred to in sub-paragraph (1) are—

- (a) human or veterinary medicines;
- (b) immunomodulatory approaches.

(3) The circumstances referred to in sub-paragraph (1) are where the matter described in sub-paragraph (2)—

- (a) has a synthetic biology technology that could be employed or modified to produce, deliver or produce and deliver—
 - (i) toxic chemicals to achieve an incapacitating or lethal effect on humans or animals;
 - (ii) materials restricted under Schedule 5 to the Anti-terrorism, Crime and Security Act 2001(a); or
- (b) uses substances or pathogens set out in Schedule 5 to the Anti-terrorism, Crime and Security Act 2001.

BIA China Special Interest Group Webinar Thursday 26 May

Tom Duke
Deputy Trade Commissioner, China
Department of International Trade

Policy reform to meet healthcare needs

- China now one of the fastest countries to launch new medicines
- Faster, better drug approval: 61 in 2021
- Drugs developed overseas account for 49% of 2021 approvals

Building up biotech

- Chinese government pledged to increase R&D spending by 7% a year to 2025
- Seven target areas including: brain science, clinical sciences & healthcare, and genetics & biotechnology

- China's 2020 spend on R&D is at 2.4% of GDP

Funding is available

- Venture capital
- Pharmaceutical companies looking for strategic investments
- High quality assets, facilities, and expertise

Venture Dollar Volume By Country In Asia, Through Q4 2021

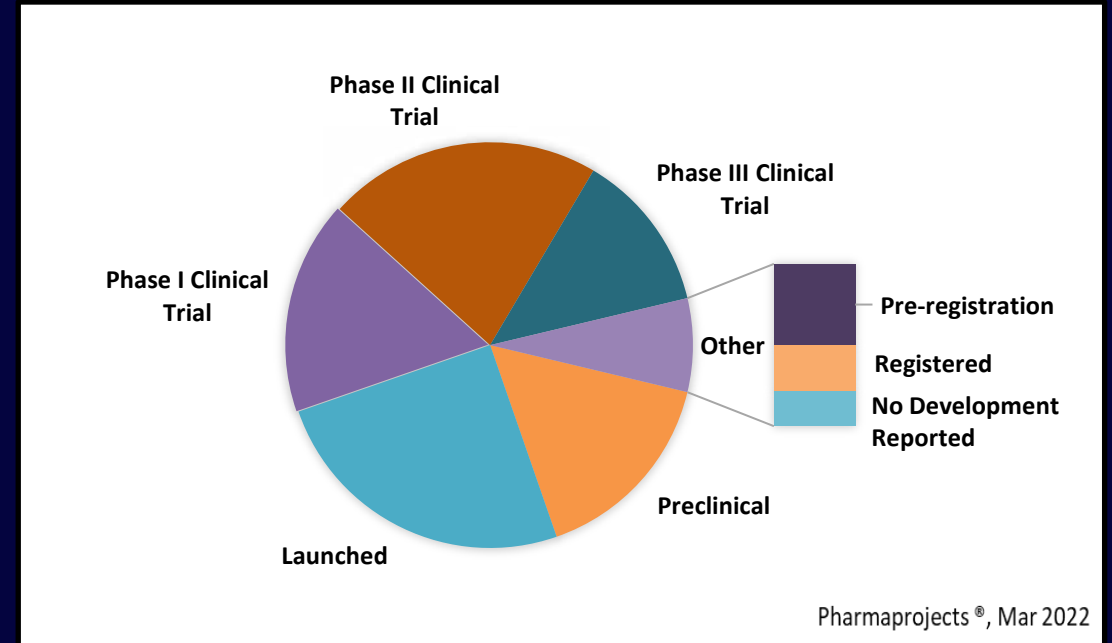

Includes seed, venture and private equity to venture-backed companies

crunchbase news

Track record of global partnerships

- Chinese companies are going global, in-licensing *and* out-licensing assets at all phases
- 171 China-inward cross-border licensing deals in 2021
- Top 5 country originators:
 - USA
 - South Korea
 - Japan
 - UK
 - Canada

Department for International Trade (DIT)

- **Individual, bespoke support including:**
 - Licensing and investment
 - Intellectual property, patents
 - Policy, regulatory, business support, exports
- **Partnering British and Chinese companies**
- **Sponsor and host events**

How can we help you?

The UK Department of International Trade is an international economic department of the UK Government, responsible for:

- Bringing together policy, promotion and financial expertise to break down barriers to trade and investment, and help businesses succeed
- Delivering the UK's trade policy framework
- Promoting British trade and investment across the world
- Building the global appetite for British goods and services.

In China, we achieve this by:

Addressing market access barriers for UK companies through direct engagement with Chinese central and regional governments, its country trade associations and individual companies.

Supporting UK businesses seeking to access the China market, whether through trade or investment, providing advice, insight and access to the optimal channels for in-country business development

Assisting Chinese investors wishing to explore opportunities to invest either in or with UK partners on mutually advantageous, sustainable and equitable projects that align with UK priorities.

BIA: Update on China biopharma landscape and partnering opportunities

26 May 2022

- UK-based, European specialty pharmaceutical company
- Focused on rare and niche endocrine diseases
- Pipeline concentrated on repurposing of existing (off-patent) compounds

Backdrop to China opportunity:

- Convergence of several factors
 - Increased focus on treatment of paediatric disease
 - First National List of Rare Diseases published (May 2018)
 - Lists 121 diseases, CAH amongst them
 - Initiatives around treatment of rare diseases
 - e.g. establishment of Rare Disease Treatment Centre, Hainan

Environment conducive to establishment of new companies focused on rare diseases

The process

- **Change in rare disease backdrop lead to Diurnal being approached by around 20 companies, through:**

- Partnering meetings e.g. BioEurope
- Website directly
- Introductions by DIT

- **Experiences of process:**

- Validation of companies can be challenging (no Companies House)
 - DIT extremely helpful in validation
- Complexity of corporate structures
 - Approached by two companies separately in same group - DIT assisted here
- Local visit highlighted sophistication of distribution networks
- Understanding local regulatory requirements (and changes)
- Board concerns e.g. intellectual property, successor products
- Chinese law vs. English law
 - Access to lawyer with local expertise

The deals

Two deals executed with RareStone (Citrine):

- **Alkindi** (hydrocortisone modified-release hard capsules) (Jan 2021)
 - Exclusive license for China, Hong Kong, Taiwan and Macau
 - Rarestone responsible for further development, regulatory, commercial
 - \$0.5 million upfront
 - Up to \$12.75m milestones
 - Royalties on sales
- **Efmody** (hydrocortisone granules in capsules for opening) (May 2021)
 - Scope as per Alkindi
 - \$1.0 million upfront
 - Up to \$28.75m milestones
 - Royalties on sales

Innovent

Innovent Biologics

BIA CHINA SPECIAL INTEREST GROUP MEETING

Astrid Maria Dahl

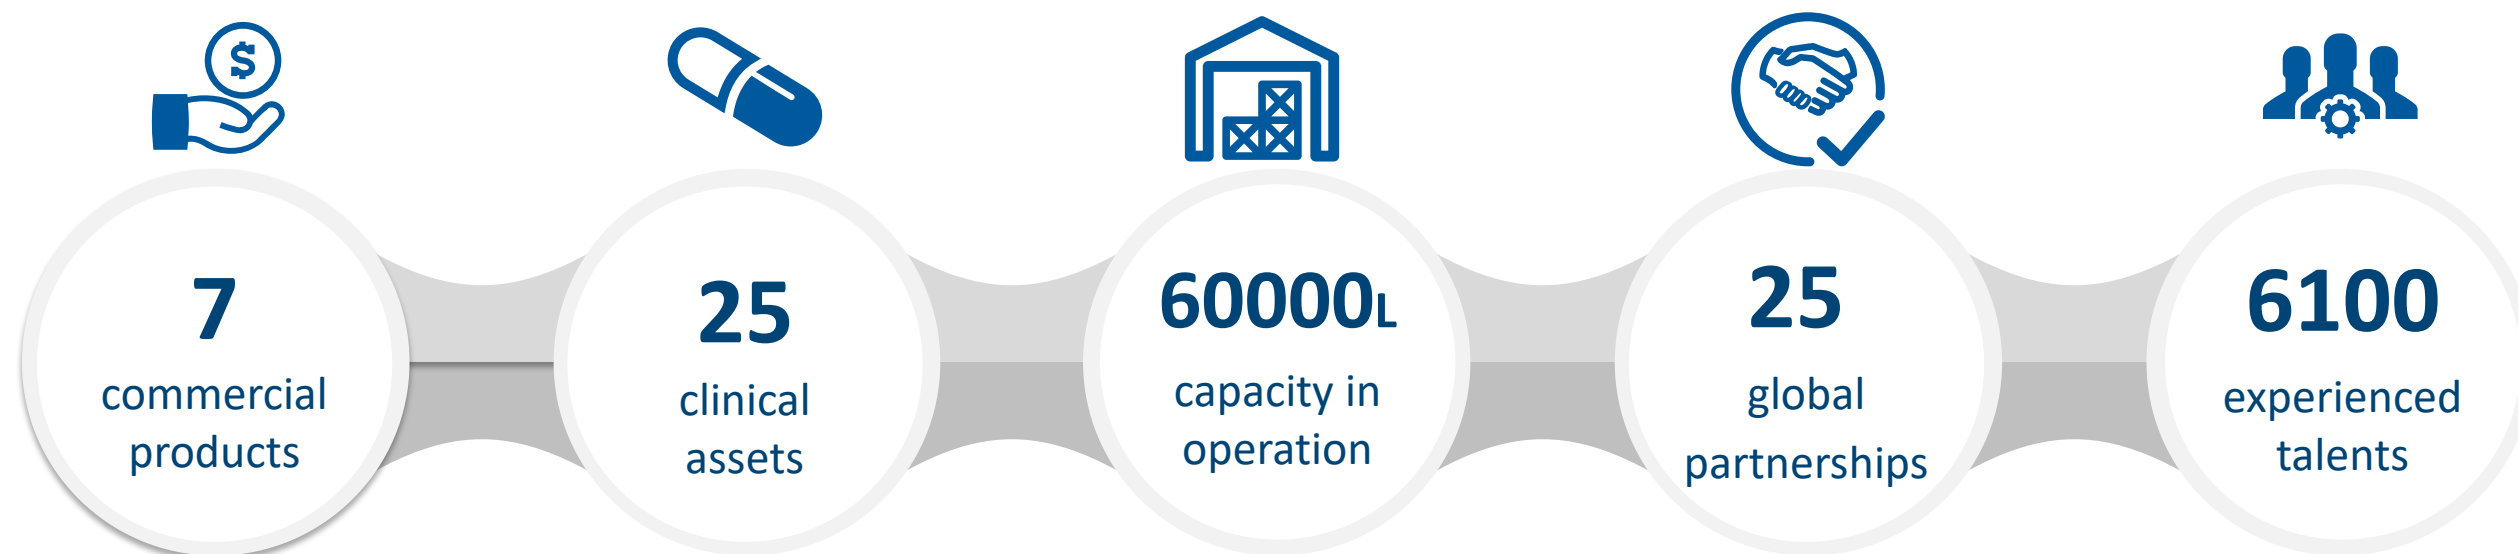

Chief Operating Officer and Head, Innovent Biologics (Europe)

MAY 26th 2022

To develop and commercialize high quality biopharmaceuticals that are affordable to ordinary people.

Innovent's First 10 Years Growth: A Solid Track Record

- 2021 total product revenue over RMB 4bn
- Accumulated sales of TYVYT over RMB 6.4bn since launch with continuous satisfactory growth momentum

- 6 assets in NDA or pivotal trials
- 19 assets in Phase I and II stages
- 80+ research programs in pre-clinical stage

- 60K liter capacity in operations. Additional 172K liter capacity under construction
- World-class CMC

- Strategic collaboration with MNCs e.g. Eli Lilly and Roche
- Partnership with regional and global biotechs

- 1,500+ R&D
- 1,300+ CMC
- ~3,000 sales & marketing

Transformed from a biotech start-up to a leading biopharma company in China

About HitGen

- HitGen was founded in 2012, headquartered in Chengdu, China
- Subsidiaries outside China include Vernalis (R&D) Ltd in Cambridge, UK and HitGen Pharmaceuticals Inc. in USA
- HitGen has ~500 employees (20%PhD, 30%MS), >20,000 m² laboratory and office space
- HitGen focuses on **DNA encoded chemical libraries (DELs)**, **fragment-based drug discovery (FBDD)** and **structure-based drug design (SBDD)** technologies, **synthetic therapeutic oligonucleotide(STO)** and **targeted protein degradation (TPD)** offering a full set of research capabilities from target to IND filing and project pipeline in oncology, immunology and inflammation
- HitGen is listed on Shanghai Stock Exchange (688222.SH)

Vernalis (R&D) Limited

>6,000 Protein/Protein-Ligand crystal structures generated – in-house detector and synchrotron access

◆ Drug discovery collaborations from target to candidate

- ◆ 6 development candidates in the past 5 years
- ◆ 20 families of Joint Patents granted
- ◆ Disclosed partners include: Asahi Kasei Pharma, Lundbeck, Servier, PhoreMost

◆ Multi-target collaborations in Target Enablement

- ◆ Focus on challenging, novel, previously undrugged targets; disclosed with Servier and Genentech

◆ Founded in 1996; Cambridge, UK-based

- ◆ Full suite of capabilities and facilities for drug discovery

◆ One of the world leaders in fragment and structure-based drug discovery

- ◆ Innovation in adopting and adapting methods, particularly in biophysics

◆ A team of ~70, most with over 20 years of drug discovery experience

Corporate Strategy Upgrade

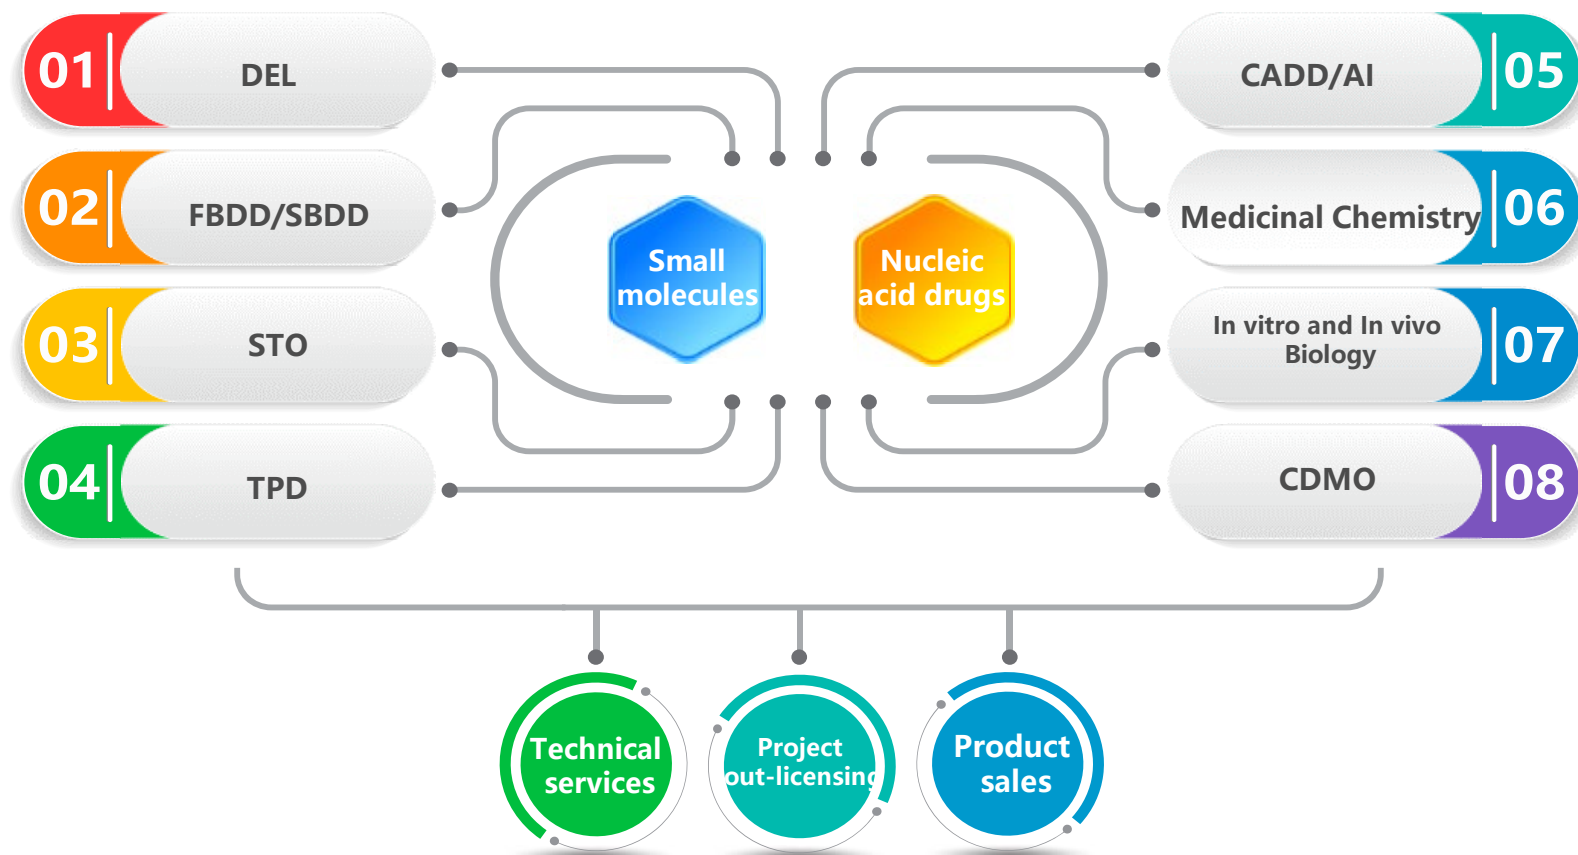

ONE Vision: To build a world-class Innovative biopharmaceutical enterprise and contribute to better life and health of mankind

Two Types of Innovative Drugs: Small molecules; Nucleic acid drugs

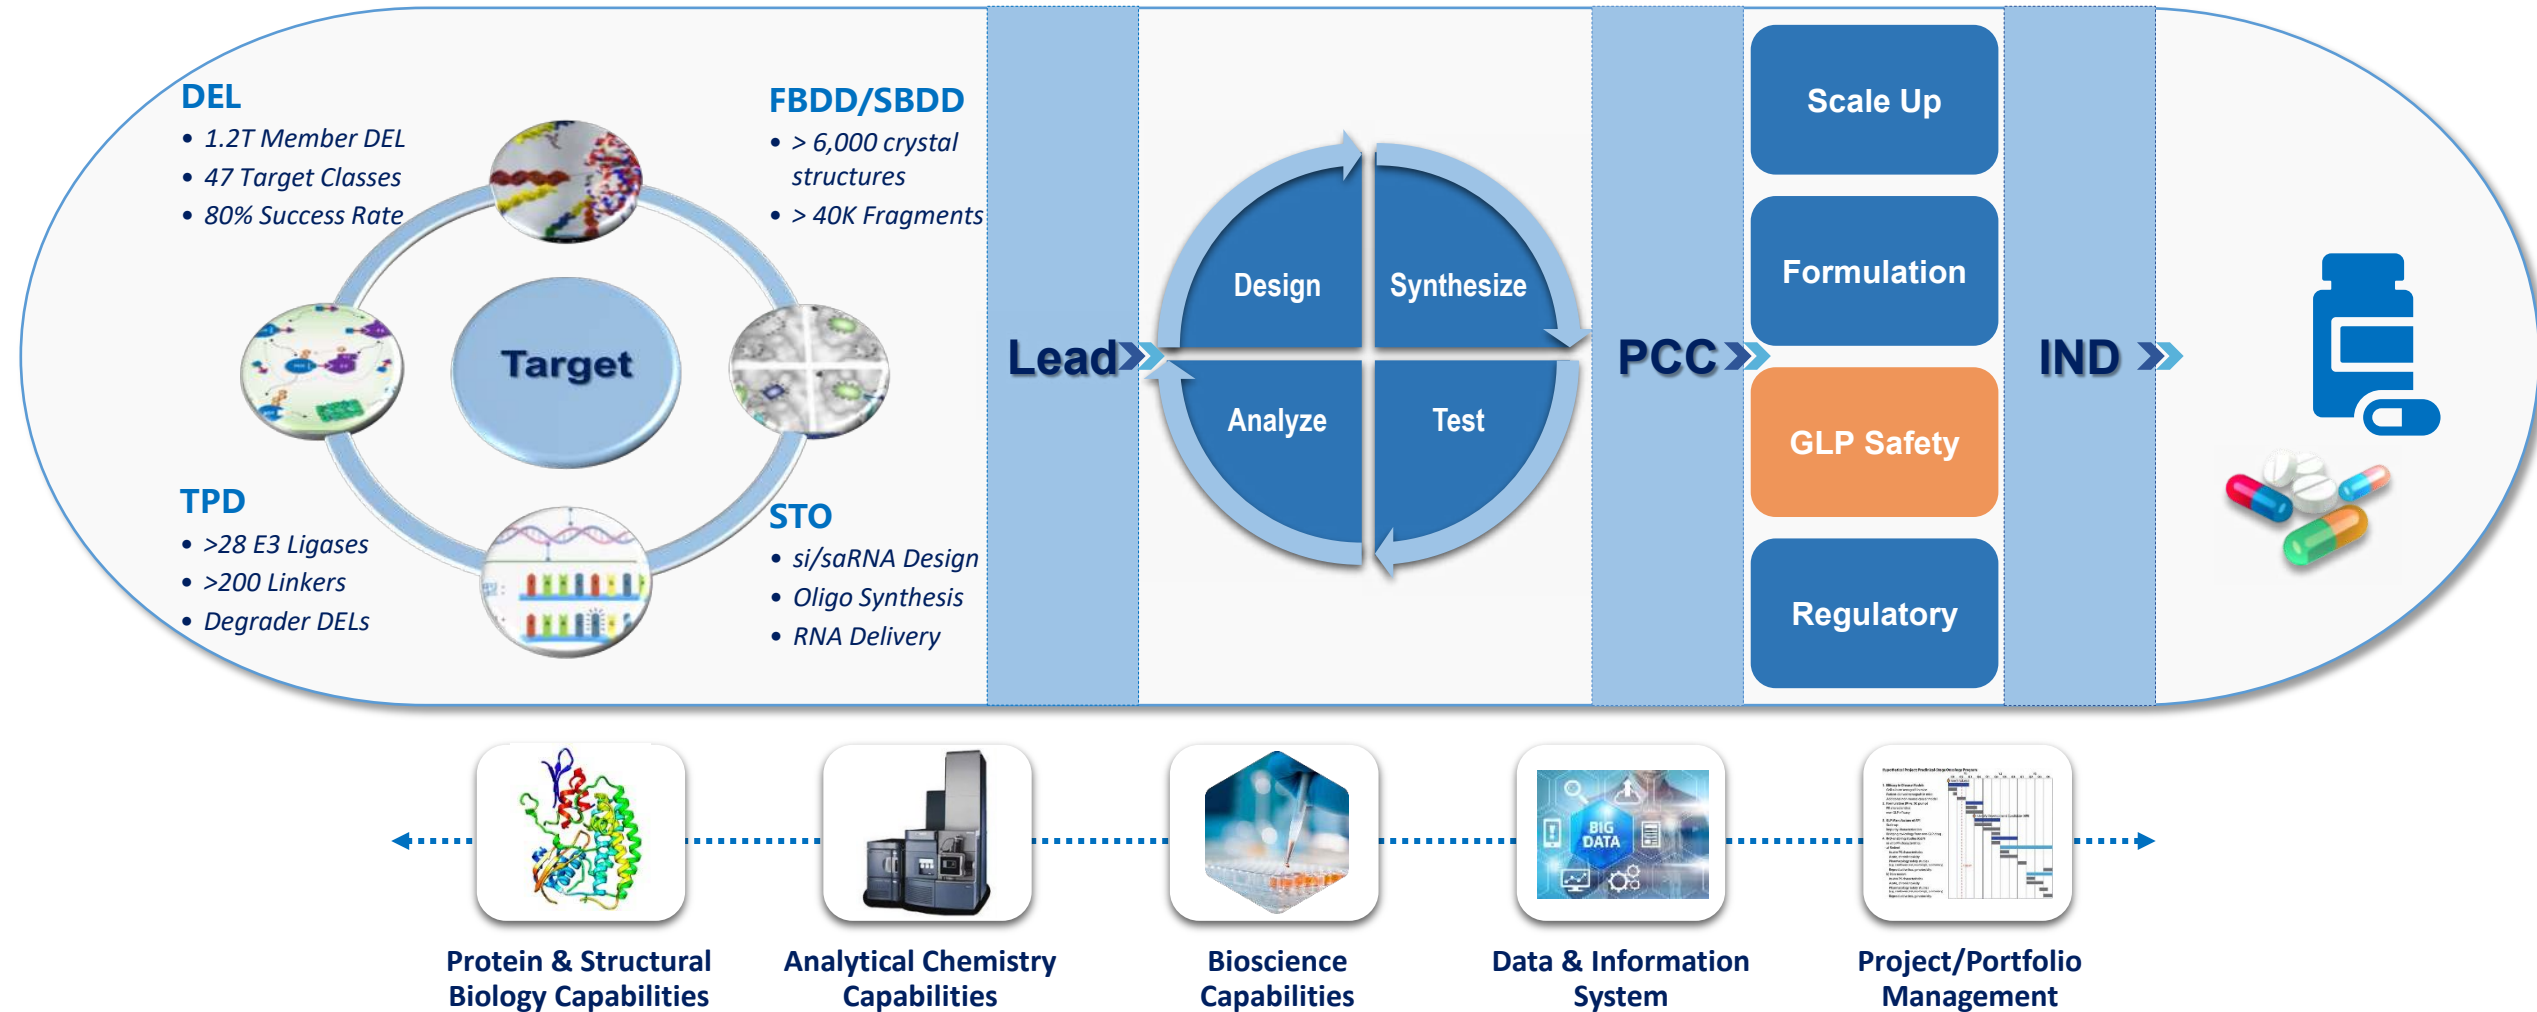

Three Business Models: Technical services; Project out-licensing; Product sales

Four Core Technology Platforms: To develop a leading technology matrix with key capabilities for drug discovery and optimization to support continuous innovative drug research, development, and production.

- DNA-encoded library (DEL)
- Fragment-based drug discovery and structure-based drug design (FBDD/SBDD)
- Synthetic therapeutic oligonucleotide (STO)
- Targeted protein degradation (TPD)

HitGen Innovative Drug Discovery Research Platform

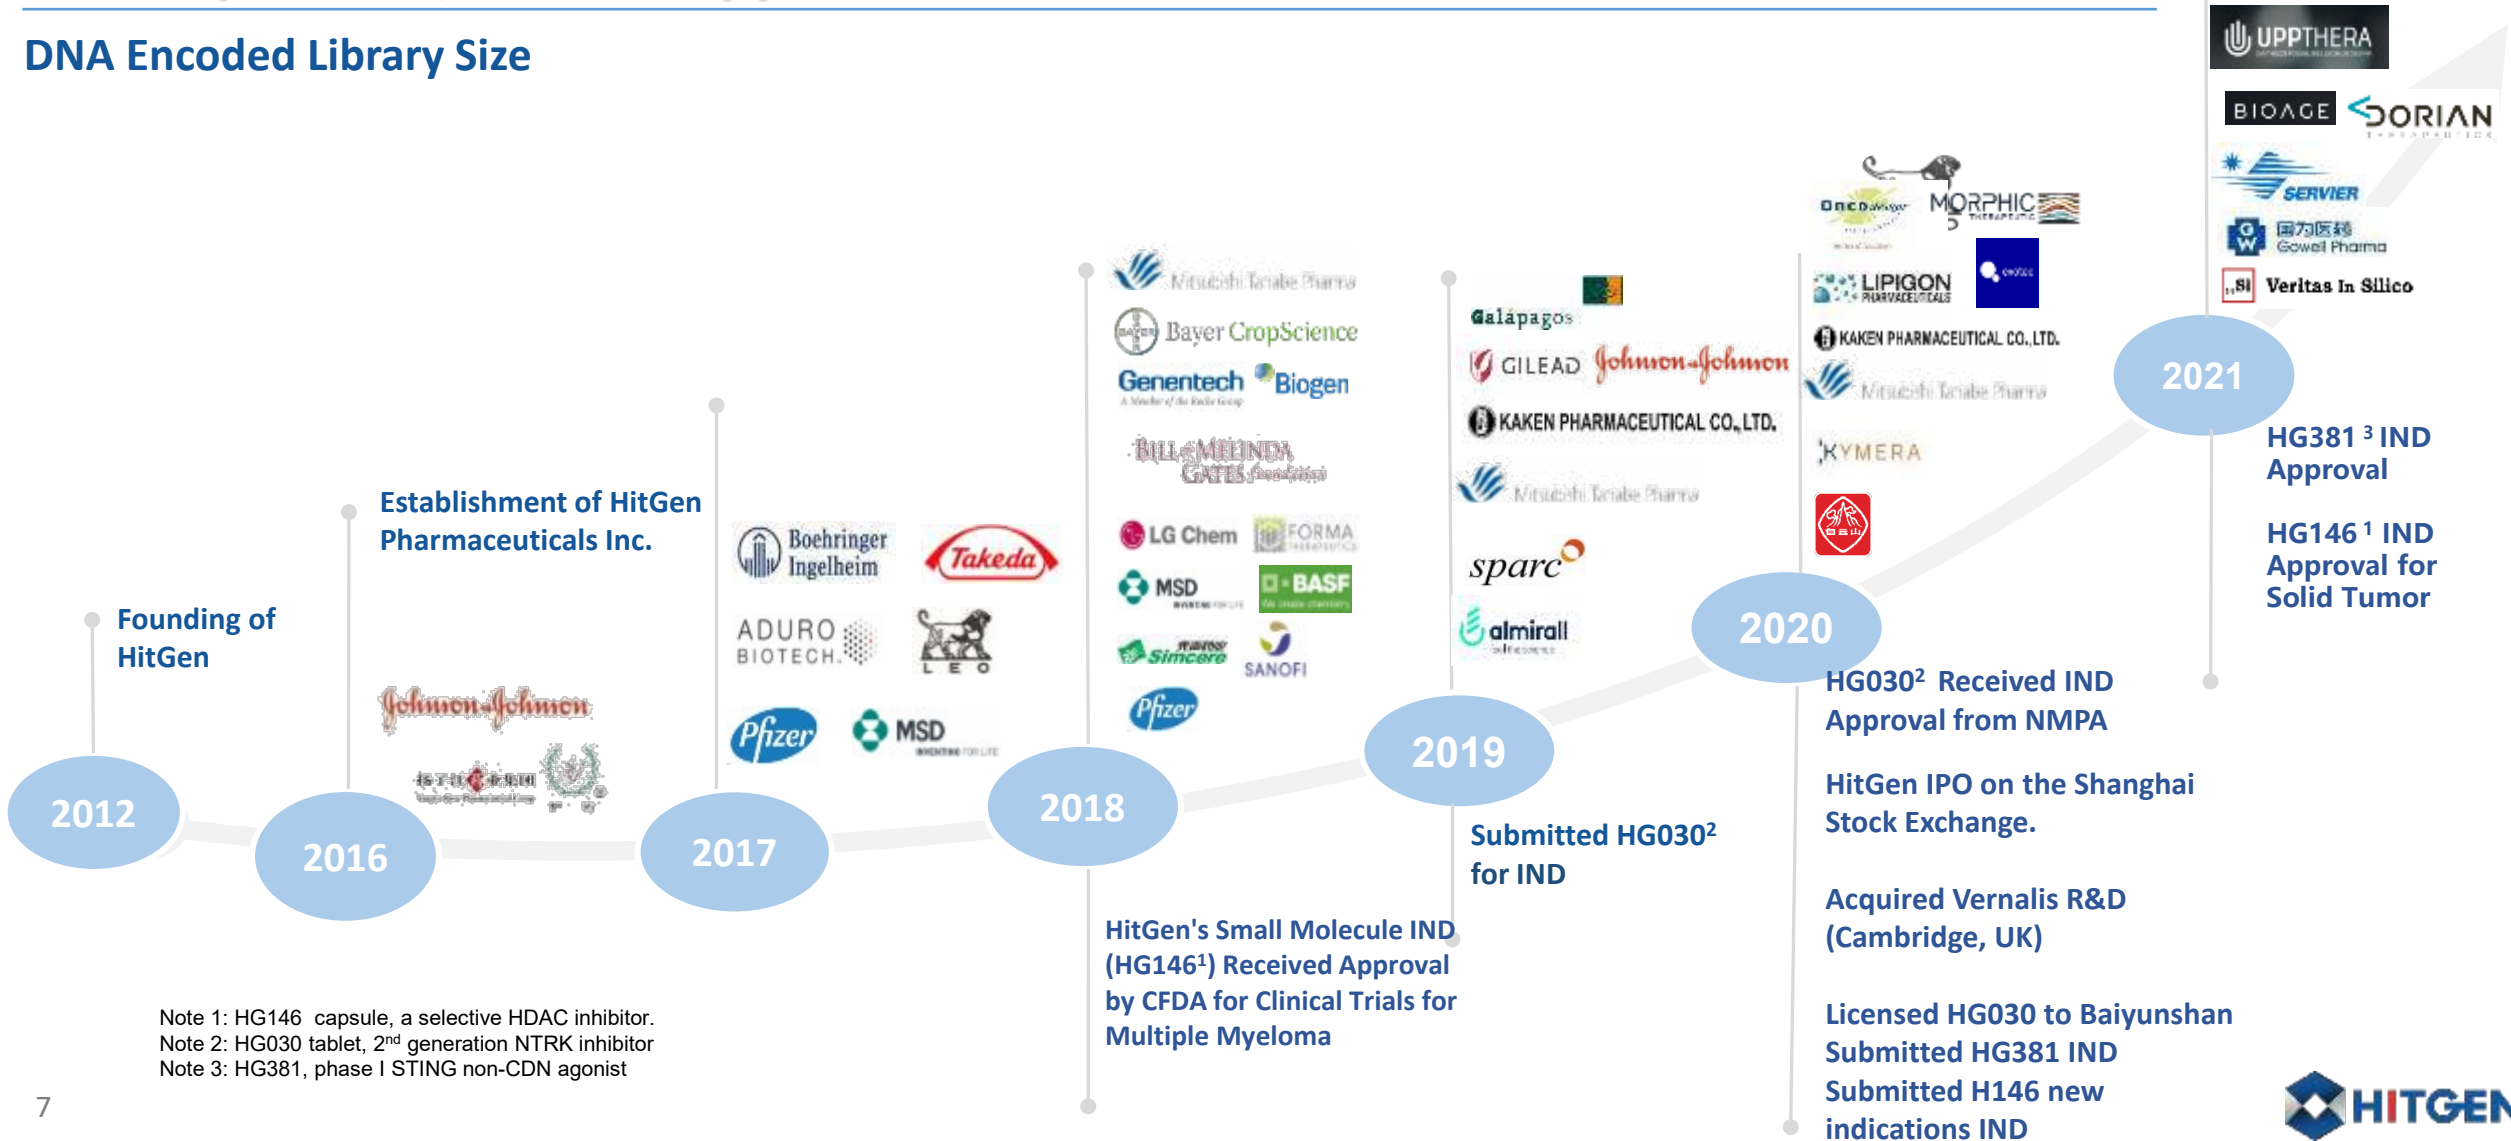

DEL: DNA-Encoded Library **FBDD/SBDD:** Fragment-Based Drug Discovery and Structure-Based Drug Design **STO:** Synthetic Therapeutic Oligonucleotide **TPD:** Targeted Protein Degradation

Business development underpinned by strong R&D investment

DNA Encoded Library Size

Expanding Drug Discovery Pipeline (2021)

Around **20** in-house drug discovery projects at different stages. Four programmes received NMPA's approvals of IND and are in Phase I clinical study.

HG030

New-generation inhibitor for Trk/ROS1.
HitGen's first project receiving IND approvals by both NMPA and FDA to conduct clinical trials.

HG146

A selective small molecule inhibitor for Class I/IIb HDAC. Multiple Myeloma (MM).

HG146

A selective small molecule inhibitor of Class I/IIb HDAC. Solid tumor.

HG381

A non-nucleotide STING agonist. Multiple advanced solid tumors.

HG030

Target:	NTRK/ROS1 Inhibitor
Indication:	Solid Tumor
Clinical Trial Stage:	Phase I
IND application approved from FDA in Jan. 2022	

HG146

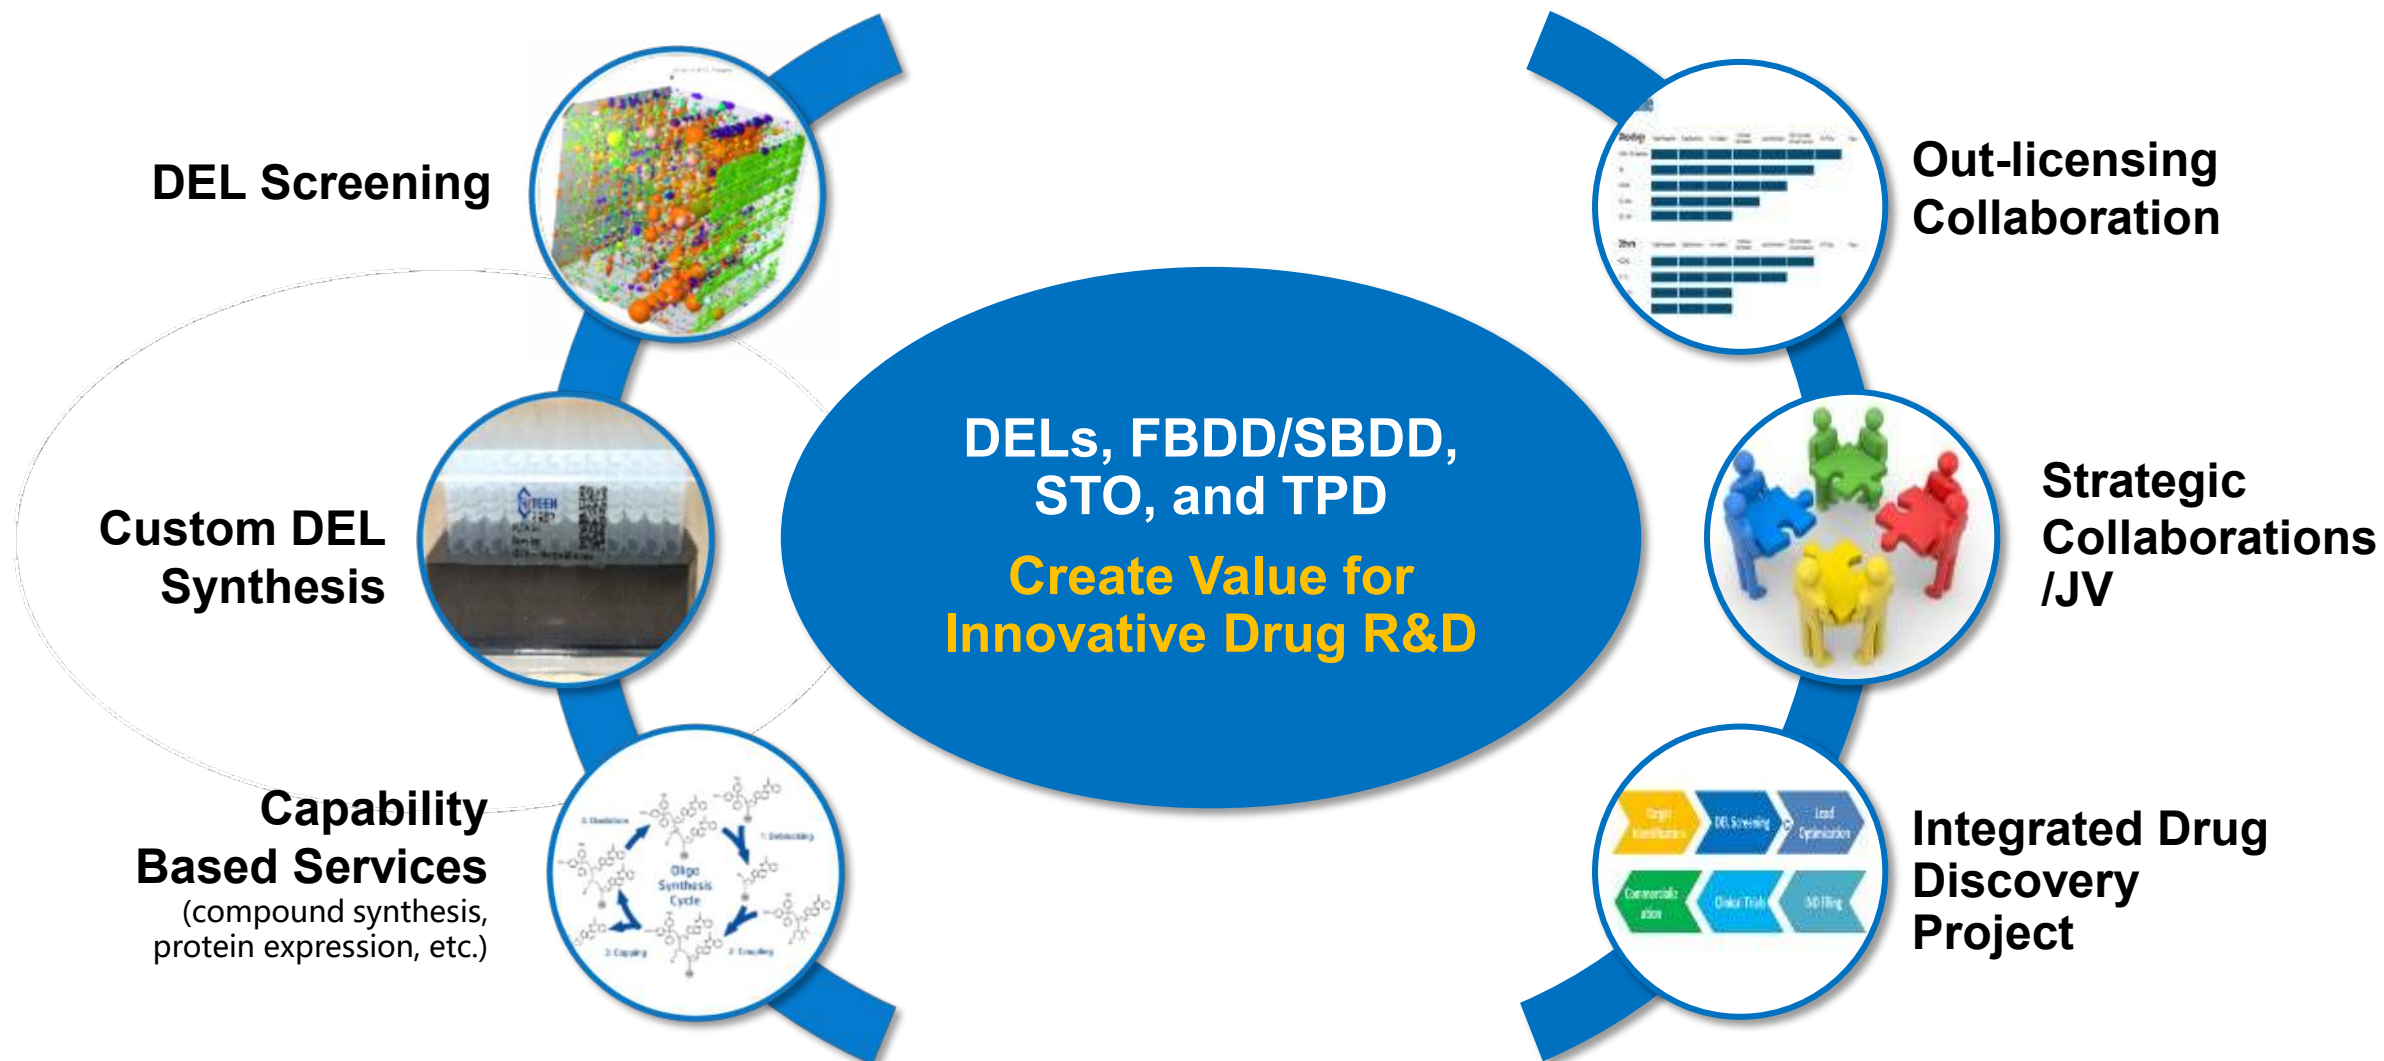

Target:	I/IIa HDAC Inhibitor
Indication:	Multiple Myeloma & Solid Tumor
Clinical Trial Stage:	Phase I

HG381

Target:	STING Agonist
Indication:	Solid Tumor
Clinical Trial Stage:	Phase I

HitGen Business Models

DELs: DNA Encoded libraries; FBDD/SBDD: Fragment-Based Drug Discovery/Structure-Based Drug Design
STO: synthetic therapeutic oligonucleotide; TPD: Targeted Protein Degradation

A National credit
endorsement business
partner for Chinese market

Since 1984
Meheco is here in China for you!

中国医药保健品有限公司
CHINA MEHECO CORPORATION

2022

Industry Position

Administration Commission of the State Council (SASAC)

Backbone state-owned enterprise directly administered by the central government

China General Technology (Group) Holding Co., Ltd.

Genertec's main platform of medicine & medical devices business

China Meheco Group Co., Ltd. (Stock Code: 600056)

China Meheco - Main International Platform (import and export)

中国医药

China Meheco Corporation

- Three main activities: advanced manufacturing & technical service, medicine & medical health, international trade & engineering service
- **Rank No. 430 in the Fortune Global 500**
- One of the three centrally-administered state-owned enterprises in medicine & medical industry in China
- **Over 330 medical institutions, over 46,000 beds, over 26 million outpatient service times per year**
- One of the three centrally-administered state-owned enterprises in medicine and medical industry in China in the A shares market
- **Ranked 3rd in the Top 100 Chinese Medicine and Health Products Import and Export Enterprises**
- Window of "Bring in" and "Go global" strategy of China Meheco
- **Undertakes the mission of National Pharmaceutical Stockpile and special medicine import business. Chinese outstanding enterprise in the fight against the COVID-19 epidemic.**
- **Ranked 2nd in the Top 100 Chinese Medicine Import Enterprises**

Genertec's Medical Institution Landscape in China

Genertec has established a national landscape of medical institutions in China, and has become a **centrally-administered state-owned medical group leading in bed number, Internet facility and industry chain building.**

Till May 2022,

330 medical institutions in **26** provinces in China (include **27** Grade 3 hospitals, **69** Grade 2 hospitals)

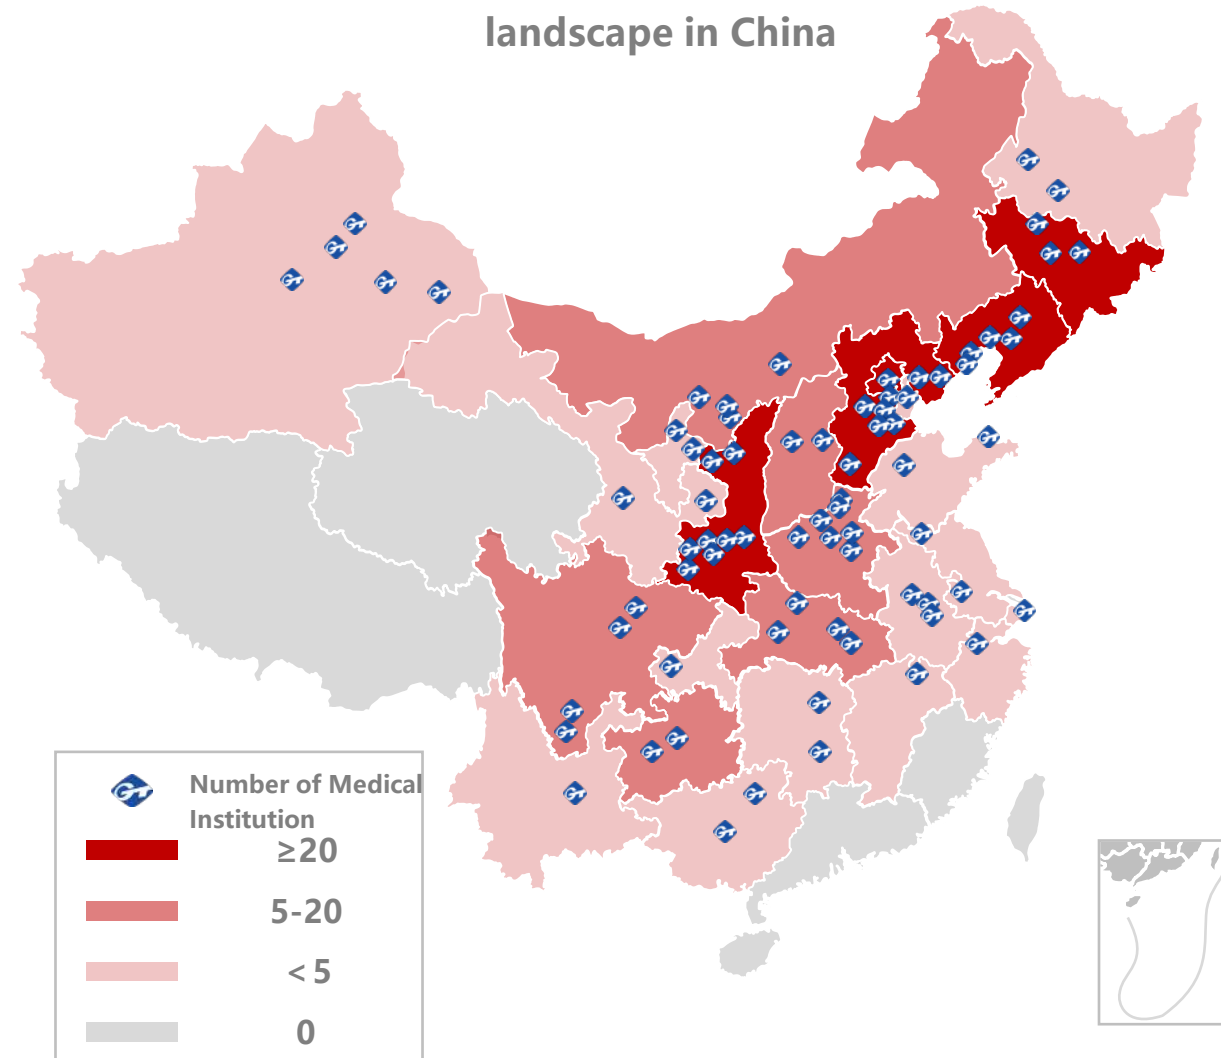

over **46,000** beds

over **26 million** times of outpatient services per year

通用医疗机构覆盖分布情况

Commercial union

The distribution network
covering 31 provinces and
municipalities

Import Business

Import scope

- Finish dosage
- Biological products
- Diagnostic products
- Medical equipments
- Medical consumables
- Health products
- Herbal products
- 2nd psychoactive drug

Business model

- General distribution
- Domestic distribution
- Terminal direct sales
- Import business
- Import service..

Service

- Product registration
- Import
- Warehousing
- Logistics
- Bonded and other fully managed customized operation models

Marketing Network

- Hospitals
- Research institutes
- Inspection and quarantine institutions
- Provincial and municipal blood stations
- Research institutes
- Domestic pharmaceutical and medical product distributors and pharmaceutical production enterprises, etc.

Import Businesses

Warehousing and Logistics

We have modern logistics centers in multiple locations and can provide our customers with integrated supply chain and logistics services.

Totally have 41 warehouses located in different main cities in China, cold storage warehouse also available.

Beijing Logistics Center

Brands we are working with:

Production Bases in China

Drafter of National standard of licorice products

Enzyme-resistant and high-efficiency compound antibiotic preparation leading manufacture

One of the largest freeze-dried powder injection production base in the world

Beijing High-tech manufacture
Over 40 years experiences of Chinese traditional patent medicines manufacturing

Designed blood products manufacture in China

Pioneer nucleoside antiviral drug manufacture in China

Leading pharmaceutical manufacture in Henan province

Integrated Service of Pharmaceutical Commercial Supply Chain in China

China Meheco is a leading medicine, medical device, health product distributor in China. We have vast **terminal coverage**, and a **medicine commercial system** with **industry value chain integration synergy effect**.

Medical institution partners: **20,000+**
Direct sales to Grade 3 A hostitals: **1000+**
Retail pharmacy partners: **16,000+**

Capabilities of Meheco that can Help You Win

- ✓ Central enterprise platform and powerful financing ability
- ✓ Full-fledged business networks and powerful terminal coverage
- ✓ Integrated service platform and quality brand influence
- ✓ Efficient talent team and comprehensive service provider
- ✓ Quality control system and registration support
- ✓ Production facilities and capacity of nearly all kinds of formulation
- ✓ Modern Logistic system and integrated comprehensive services
