techbio.uk

Why TechBioUK?

At the BIA, we are on a mission to explore the impact that data-driven life sciences companies are having on drug discovery: delivering more personalised treatment, faster and more cost effectively.

- **Showcase** the technologies and the people
- **Grow** your techbio network
- **Explore** shared challenges and UK opportunity
- **Partner** with investors, techbio companies and pharma

Working at the interface between biotechnology and technology – TechBio companies combine cutting-edge techniques from both sectors to draw insights from a wealth of data, including data concerning patients, drug molecules, healthcare infrastructure and research and development, to inform and transform drug discovery and patient care.

The UK government is now working to capitalise on the innovation inspired by the pandemic response, using it as a blueprint for the UK Life Sciences Vision launched in July 2021. This sets a 10-year strategy for the life sciences sector to accelerate delivery of innovations to patients, much of which will come from data-driven life sciences companies.

The work of these companies and their ground-breaking technologies has never been more relevant.
