TechBio UK 2025
16 October 2025

About the conference

Working at the interface between biotechnology and technology – [TechBio companies](#) combine cutting-edge techniques to draw insights from a wealth of data - informing and transforming drug discovery and R&D challenges more widely in bio-, agri- and industrial technologies.

The work of these companies and their ground-breaking technologies has never been more relevant, both in terms of getting more targeted life-saving cures to patients faster and creating transformative, fundamental solutions to global sustainability.

If you are a TechBio company looking for your tribe, or a Biotech, Pharma or investor looking to tap into the potential, don't miss TechBio UK!

TechBio Future Talent poster competition

For the second year running the TechBio UK Conference will be running a post graduate and early career researcher Poster Competition, where approximately 15-20 high calibre postgraduate students and post-doctoral researchers have an opportunity to display a poster showcasing their research in this field.

Presenting a poster is beneficial to career and professional development of young researchers. The competition offers entrants a chance to build their network by engaging with industry professionals and provides a fantastic opportunity to raise awareness of their research and gain exposure to leading companies at the cutting edge of data drive tech.

> *"I was delighted to be awarded an invitation to attend the TechBio UK conference and present a poster displaying my research. The conference presented a fantastic opportunity to network and learn about the TechBio industry. The sessions and workshops were engaging and informative. I came away from the conference with a much keener awareness of the exciting opportunities within the TechBio industry."*
> ***- 2023 Future Talent applicant***

Successful applicants will receive a complimentary conference ticket and will be offered up to £100 reimbursement of their travel costs (if travelling from outside of London).

Our expert judging panel will vote to determine a winning poster, for which a prize will be awarded. This is likely to be an Amazon voucher.

Eligibility
The poster scheme is targeted at early-stage researchers completing their postgraduate studies, engaged in their first postdoctoral position or at Masters level. Your poster will have to display research in the field of Computational Biology/Chemistry, Bioinformatics, AI/ML applications for Healthcare/Discovery, Cheminformatics, Data Science or Systems Biology.

What you must include in your application
- Include a brief abstract of no more than 200 words about your research. Please be aware that the audience is predominantly industrialists.
- Include the name of the academics and academic institutions involved in the research.
- Please name any industrial collaborations.
- Reference any associated academic papers.
- Please ensure you poster and conference attendance is signed-off by your supervisor.
- Fill out the participation confirmation form below (or you could just add that information to your email).
