About the Event

BIA's annual Future of Regulation and Access Conference explores how regulation, reimbursement and healthcare adoption must work together to support innovation and patient benefit in the UK.

Bringing together speakers from UK government and arm's length bodies, including the MHRA, NICE, NIHR and HRA, alongside industry and patient representatives, the conference will examine the evolving landscape for clinical trials, medicines regulation, and access and reimbursement.

Join us at this event to:

- **Connect** with fellow disruptors
- **Showcase** your biotech
- **Gain insights** from leaders shaping the bioeconomy

Designed for leaders and professionals across pharma and biotech including CEOs, General Managers, and those working in regulatory affairs, market access, government affairs and policy, the conference offers a unique opportunity to hear the latest policy developments, share insights and connect with decision-makers shaping the future of UK life sciences.

Why BIA?

- BIA is a **leading voice** for the UK life sciences industry on **medicines regulation** and **access**. We work with government, regulators, and other stakeholders to ensure that the regulatory environment is supportive of innovation and patient access to new medicines.
- This annual regulatory conference is supported by the **Medicines and Healthcare products Regulatory Agency** (MHRA) and brings in globally recognised speakers to discuss and debate key regulatory policy issues for the life sciences sector.
- Our continued work through the **Regulatory Affairs Advisory Committee** (RAAC) supports BIA's regulatory affairs activity and provides the opportunity for BIA members to contribute to its agenda.
- We engage closely with the **National Institute for Health and Care Excellence** (NICE) on patient access to innovative medicines in the NHS, including through better alignment of regulatory and access systems, and improvements to health technology assessment methods and processes.
- BIA's **Rare Disease Industry Group** (RDIG) works with all stakeholders to improve patient access to treatments for rare diseases, setting out solutions to inform improvements to the way these medicines are assessed, reimbursed and made available in the NHS.

2025 Conference highlights

Headline Supporter

- Opportunity to open the conference with welcome address
- Priority branding across event and on all digital marketing
- Priority exhibition space in networking area
- Opportunity to brand the attendee lanyards
- **5** tickets to entire event
