

Timeline

Dr Daniel Peters
CEO, MarraBio

Attended PULSE

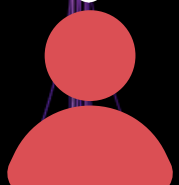

March 2022

Key person added

April 2022

Aidan Benedict Courtney as
Executive Chairman

Incorporation

August 2022

Took part in Accelerate@Babraham

Stage of evolution

August 2022

Stage of evolution set to Seed

Accelerator attendance

February 2023

ICURE programme

Grant £239,000

February 2023

part of IUK project: Engineered
Protein Polymers for Industrial Cell
Culture (EPPICC)

Academic spinout

February 2023

Spun out from Newcastle
University

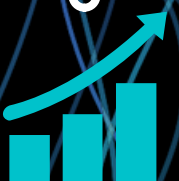

New fundraising

September 2023

Secured an equity fundraising:

£500,000
for a 28% stake

**£1.28 million
pre-money**

with CPI Enterprises, Maven Capital
Partners, Northstar Ventures, TCS
Biosciences

Grant £140,000

October 2023

Part of IUK project: High potency food
grade growth factor mimics for low
cost cultivated meat manufacture

Grant £111,000

October 2023

Part of IUK project: Developing novel
animal cell lines and processes
incorporating engineered caf1 to scale
cultured meat protein manufacturing

Grant £46,400

October 2023

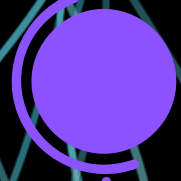

Tools and technologies for
cultured meat production

Employee count

October 2023

Number of employees increased
from <5 to 5-9

**Launch of first
products**

June 2024

Grant £69,800

June 2025

Part of IUK project: Translating
Angicyte® from allogeneic to
autologous – a robust development
process for a low-cost vascular therapy
for personalised medicine
