

# Genomics nation 2022

Showcasing the UK's genomics sector

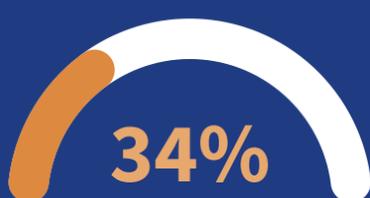

The UK is home to a vibrant ecosystem of high-growth genomics companies

They are particularly young and innovative:

50% are at early or seed-stage

34% of these companies are spin-outs

They employ over 3,500 highly skilled staff, from a range of disciplines:

Recruiting staff with appropriate skills is a challenge

Data & computational science skills are the most difficult to recruit for

They are successful at attracting investment:

**£1.85bn**

venture investment raised

23.4% of investment in the life science sector\*

**£76.5m**

grant funding received

21.2% of all grants awarded\*

\*despite representing 9.8% of the sector
